

# BEAR INFO

We will limit the number of hunters, so we can have a well informed hunt with personal attention given to each hunter. Our baits are set at least 14 days in advance of our hunters' arrival. We take pride in our hunt and will make every effort to see that our hunters have a successful hunt! 10 Hunters per 150 sq. mile per year.

## IMPORTANT FACTS ABOUT OUR HUNT

We have a large bear management area with over 250 square miles of hunting area. It is located in a maze of good logging roads that are accessible by two wheel drive trucks. This area is used exclusively by our hunters, so we can control the bear harvest. This will assure us of a good hunt.

We also have an excellent area to hunt 75 miles north of camp. This area is 125 square miles. A good logging road runs right through the center of it, plus it has many side roads. This area has been hunted very little and has a high concentration of bear.
